

WasteMaster *Ejector*

Ejection trailer for the transport of household and industrial waste

30 years experience in waste transport & logistics

For ejectors, make a choice of quality

And take the benefit of incomparable characteristics :

- **STEEL CHASSIS** : full-length chassis, better rigidity and stability on landfill;
- **VOLUMETRIC BACK DOOR** : extra cubic meters, floor does not have to be tapered at the rear to assist discharge;
- **INCREASED GROUND CLEARANCE** : slack adjusters and air bags above the axles for better protection on landfill;
- **REINFORCED FLOOR** : Complete Hardox® floor;
- **OPTIMUM BLADE DESIGN** : Correct blade design for optimum push effect; Hardox® neck for longer life;
- **EASY MAINTENANCE** : pusher blade mounted on easily replaceable nylon bearings : not metal-to-metal; pusher blade guides open at front and rear to prevent compaction damage from overspill; Easy access on front bulkhead.

WasteMaster *Ejector*

Ejection trailer for the transport of household and industrial waste

open pusher blade guides

open bulkhead for easy access

effectiveness in action

volumetric rear door : extra m³
